

The FCC should not implement any proposal lessening Indiana's Telephone Privacy Law. My mother is handicapped and lives with me. In the past (when we lived in Illinois) we received up to 10 tele marketing calls per day. Since moving to Indiana, and being covered under the Telephone Privacy Law and having Privacy Manager offered by my phone company, we now get less than 3 per week. She is now able to get the rest she deserves and needs. Please do not initiate any law which would diminish Indiana's ability to provide it's residence with privacy they request.
